

# Western Digital Celebrates 40 Years of Technology Leadership

Western Digital was founded in 1970 and has grown into a global leader in the development and manufacturer of hard drives and solid state drives for internal, external, portable and shared storage applications. In recent years we've led the market in many key areas of digital storage technology. We value the relationships we've built with our customers and partners and would like to thank you for being a part of our success.
